

Afinion Project-Viewer Version 5.1

Main Features

- ◆ **Afinion Project-Viewer** is secure, as no data can be saved in the original project plans. So your employee cannot save any data accidentally.
- ◆ **Afinion Project-Viewer** displays plans of **MS Project** (Project 98, 2000, 2002, 2003, 2007, Project Server 2003)
- ◆ **Afinion Project-Viewer** displays plans of **SAP PS** (network plans, wbs elements, tasks)
- ◆ **Afinion Project-Viewer** displays plans of Excel
- ◆ **Afinion Project-Viewer** is easy to handle, as only a few mouse clicks are enough to display the data.
- ◆ **Afinion Project-Viewer** has a fully working time recording functionality with Project 2000, 2002, 2003.
- ◆ **Afinion Project-Viewer** allows you to define your own time format including calendar weeks and the American time format. This format can be stored. Also calendar weeks are possible

- ◆ **Afinion Project-Viewer** supports fully our Smart Project Server (please look on our homepage www.afinion.com) the easy Project Server for departments and small organisations
- ◆ **Afinion Project-Viewer** is a simple Java application, so no time-consuming installation is necessary (only copying the files into a folder).
- ◆ **Afinion Project-Viewer** has a special mode for Microsoft Windows Terminal-Server/Citrix Metaframe/XenApp.
- ◆ **Afinion Project-Viewer** is running on **Windows, Mac OSX, Linux, Solaris and Unix**. For Mac and Unix-versions please download corresponding version 3.0.
- ◆ **Afinion Project-Viewer** can store all activities which are assigned to a resource directly into the Outlook task folder of the resource. The resource can choose if all tasks over all projects in the database or all tasks of one project shall be exported.
- ◆ **Afinion Project-Viewer** supports all currently used MS Project versions (Project 98, 2000, 2002, 2003 and 2007 as mpp file) simultaneously. Thus you can support all sort of plans (old and new ones) with one version of Afinion Project-Viewer.
- ◆ **Afinion Project-Viewer** uses the common database versions (SQL-Server und MS Access Project Server) used for MS Project 2003. So maintenance is easy and fast.
- ◆ **Afinion Project-Viewer** shows different views used by the project manager.
- ◆ **Afinion Project-Viewer** has a standard view which the user can transform in an individual view corresponding to his needs.
- ◆ **Afinion Project-Viewer** can print the plan in the formats A4 to A0, only limited by the available plotters and printers.
- ◆ **Afinion Project-Viewer** can print only the table part of a plan if you don't need the bar chart.
- ◆ **Afinion Project-Viewer** has the alternative to enable/disable connections in the Gantt chart to get a clearly arranged view.
- ◆ In **Afinion Project-Viewer** you can define the timescale in a free manner, so you can view the tasks in a daily, weekly, monthly, quarterly base.
- ◆ **Afinion Project-Viewer** is easy to install. Also novice users have no problems and only few effort to see their tasks.
- ◆ **Afinion Project-Viewer** is also available as Server Version so it can be used on a USB-stick.
