

Installation Guide:

1. Download the Afinion Project-Viewer.
2. Basically there is no installation of SAP GUI required, to run the Project-Viewer.

If you do have installed the SAP GUI, please consider the following:

The Afinion Project-Viewer requires the file LibRfc32.dll Version 6206.6.1456.4314. or higher.

This file must be copied into the directory Windows\system32.

You will find the file in the directory, you unpacked the Afinion Project-Viewer into. The default directory is:

C:\Program files\AfinionViewer\PViewer.

You can also download the file from SAP directly:

URI: <http://service.sap.com/connectors>

Go to SAP Java Connectors\Tools & Services | Download SAP JCo Release 2.1.3 | Windows 2000,... - 32 bit SAP JCo 2.1.3.
and download it as zip file.

3. Unpack the Afinion Project-Viewer into a directory of your choice.
4. Decide if you want one, two or three start up possibilities (directly after unpacking, you'll be asked if you'd like to have a link put onto your desktop, your quick-bar or your program bar).
5. The installation is done.
6. Now start the Afinion Project-Viewer by doubleclicking onto one of your shortcuts. Then navigate to the Connection Manager in the Files menu. Activate "new" and choose SAP. Please enter your connection data here.
7. Go to Connections. Your chosen database connection is displayed. With the four buttons you can choose what you want to be displayed (network plans, project definitions with attached activity, project definitions with attached PSP-elements, project definitions on PSP-elements and activities as well as the displayed project definitions respectively network plans)
8. Done.
